

Disable Butler at RS Production startup

If you have the need in to disable Butler to be started and installed when RS Production is started then run the attached reg-file. The reg-file sets the Windows registry key: HKEY_CURRENT_USER\Software\Good Solutions AB\RS Production\ensurebutleratstartup value to 0

Step-by-step guide

1. Download the reg-file: [DisableButlerAtStartup.reg](#).
2. Right-click the downloaded file, in the context menu: select Properties, clear the "Unblock"-checkbox and then Ok.
3. Double-click the downloaded file in order to run it.
4. You will now be presented to three dialog windows, take the following actions:
 - a. UAC control dialog
 - i. Accept that the file could do changes to your computer.
 - b. Registry editor dialog (warning)
 - i. Accept to continue:
 - c. Registry editor dialog (information)
 - i. Press Ok in order to continues
5. You are finished
